5. (currently amended) A fabric care composition as claimed in claim 1, adapted for use in a laundering process, comprising:
 - a) an anionic polymer which is capable of self cross-linking and/or of reacting with cellulosic fibres and further comprising
 - b) a fabric conditioning agent which acts as a textile compatible exhaustion agent for the anionic polymer;
 - c) wherein the polymer is selected from carbamoyl sulphonate terminated poly(ether)urethane resins, bunte salt terminated polymers and mixtures thereof having formula (I):

wherein: Y is a divalent radical selected from

-CH₂-CH(OH)-CH₂-S-

and -CO-NH-(CH₂)_p-NH-CO-

m is an integer from 0 to 4;

n is an integer from 5 to 20;

M is an alkali metal; and

p is an integer from 2 to 12; and

- d) wherein m is 1, Y is -CO-NH-(CH₂)₆-NH-CO- and M is sodium; and
- e) wherein the exhaustion agent is a quaternary ammonium compound.

6. (currently amended) A Gcomposition as claimed in Claim 5, wherein the quaternary ammonium compound is HEQ1,2-bis-[hardened tallowoyloxy]-3-trimethylammonium propane chloride.

7. (currently amended) A cComposition as claimed in claim ((1))5, which is a fabric softening composition, conditioning composition, or blend thereof.

8. (currently amended) A cComposition is as claimed in claim ((1))5 which further comprises a perfume.

9. (currently amended) A Method of treating a fabric, as part of a laundering process, which comprises applying to the fabric a composition according to claim ((1))5.

10. (currently amended) A Method as claimed in Claim 9, wherein the fabric comprises cellulosic fibres.
